

TROOP 65

Statement of Risk and Release of Liability

Your safety and the safety of all our members, volunteers, and employees in the Mecklenburg Council and Troop 65, safety is our top priority. In light of COVID-19, we are taking additional precautions for participation at our council and Troop Level.

Mecklenburg County Council and Troop 65 will follow the guidelines as outlined by CDC, State of North Carolina and the National Boy Scouts of America. The guidelines from these organizations change as new information is obtained, as a result, mitigation procedures may change. Our full COVID-19 mitigation plan can be found on the Mecklenburg County Council's website, www.mccscouting.org.

Our mitigation plan is important, but it cannot remove the potential for exposure to COVID-19 or any other illness while at Scouting Functions. Some people with COVID-19 show no signs or symptoms of illness but can still spread a virus, and people may be contagious while they are asymptomatic. This means that an infected person may pass the required health screenings and be allowed at Scouting functions.

We realize that the very nature of Scouting functions makes social distancing difficult in many situations and impossible in others. We encourage everyone to maintain the proper physical distancing in accordance with the CDC guidelines.

We know that each Scout, Scouter, volunteer, and Scouting family has a unique set of circumstances to consider when deciding whether to attend Scouting functions. We hope this information will be helpful as you make those choices.

On the opposite side of this page is a Waiver and Release of Liability related to COVID-19. Please read the entire page. Then, please fill out the bottom portion and sign the form. This form must accompany each Scout and adult attending any unit functions.

Waiver and Release of Liability Relating to Coronavirus/COVID-19

The novel coronavirus, COVID-19, has been declared a worldwide pandemic by the World Health Organization. COVID-19 is reported to be extremely contagious. The state of medical knowledge is evolving, but the virus is believed to spread from person-to-person contact and/or by contact with contaminated surfaces and objects, and even possibly in the air. People reportedly can be infected and show no symptoms and therefore spread the disease. The exact methods of spread and contraction are unknown, and there is no known treatment, cure, or vaccine for COVID-19. Evidence has shown that COVID-19 can cause serious and potentially life-threatening illness and even death.
